

UPS Customer Solutions

Client Credentials

Overview

Introduction

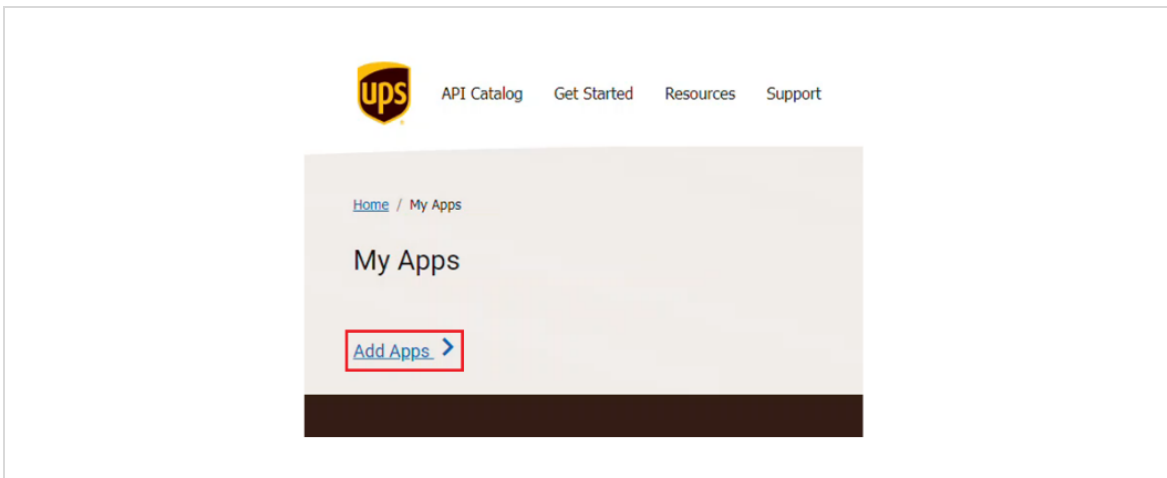

This document walks you through the steps on how to set up client credentials for any UPS® Customer Solutions application within the UPS Developer site to utilize the UPS API Services.

Create App Specific Client Credentials

1. Go to [UPS Developer Home page](#) and log in with the **UPS.com** user account.
2. On the home page, click the **My Apps** option at the top-right corner next to the User Icon. The My Apps page appears.

3. On the My Apps page, click **Add Apps** to add and configure your Customer Solutions application.

4. On the next page, fill the following:
 - a) Under I need API Credentials because, select I want to Integrate UPS technology into my business.
 - b) Under **Choose an account to associate with these credentials**, select/add a biller account of your choice to invoice the UPS services usage.
 - c) Read and agree to the UPS API ACCESS AGREEMENT
 - d) Click **Next**.

Which of these scenarios best describes you?

* Indicates required field

I need API credentials because

Select One

Select One

I want to integrate UPS technology into my business

I want to integrate with UPS technology to represent many users

Select One

I agree, and confirm I have the authority to agree on behalf of my organization, to the [UPS API ACCESS AGREEMENT](#), which contains important terms governing use of UPS technologies and information like limiting UPS's liability and how disputes with UPS will be handled.

Next > [Cancel](#)

5. On the next page, fill the following:

a) Primary contact details:

- First Name and Last Name
- Country or Territory
- Street Address
- City, State, and Zip Code
- Email and Phone Number

b) If an integration owner assists you with the API integration, enable the **check to specify separate API integration owner** option and provide the following details of the integration owner,

- First Name and Last Name
- Email and Function/Position/Title

c) Optionally, you can also provide the secondary contact details and subscribe to the email alerts for UPS services' status & update.

6. Click **Next**.

Who should we contact?

* Indicates required field

Primary Contact

First Name

Last Name

Country or Territory

United States

Street Address

City

State

Zip Code

Email

Phone

Extension (optional)

Check to specify separate API Integration Owner.

API Integration Owner

First Name

Last Name

Email

I'd like to subscribe to API Status & update email alerts.

I certify I am the owner of this email and authorize UPS to send notification updates to this address

Enter email if different from primary above:

7. On the next page, fill the following:
