

UPS® Intelligent Rating

Authorization Code Flow

2024

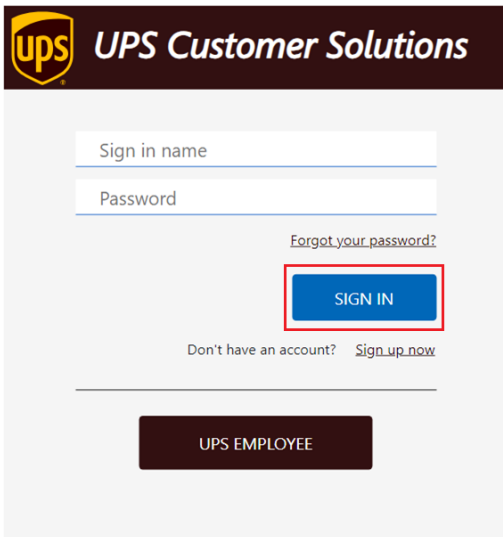

Introduction

This document walks you through the steps on how to set up authorization code flow for **UPS® Intelligent Rating** Customer Solutions application. This process requires that the user is already registered in **UPS.com**.

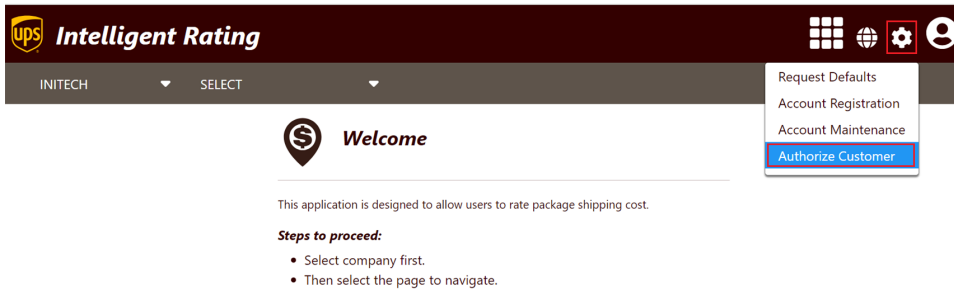

Authorize the application through UPS.com

The user must authorize the application through **UPS.com** to generate an access token. Begin by logging into the application.

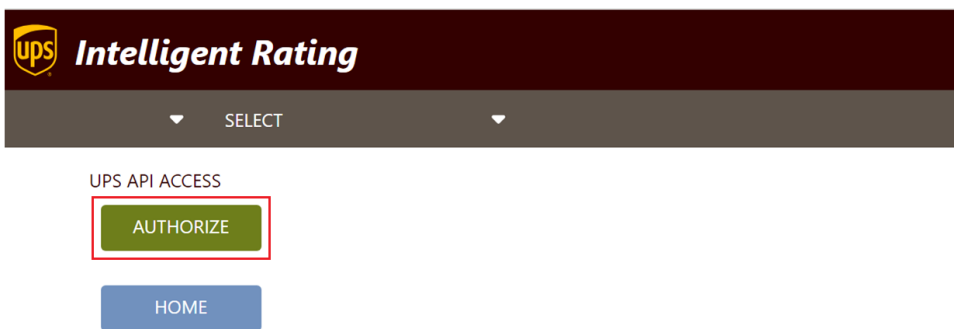

1. Log in to **UPS® Intelligent Rating** using your **Sign In name** and **Password**.

2. The Intelligent Rating landing page displays. Click **Settings** and select **Authorize Customer**.

3. This will display a company manager page, click **Authorize** on the selected company.

 **Tip:** Click **Home** to return to the Rating application landing page.

4. Now you are getting redirected to UPS.com to grant permission and validate your credentials.
 - a. Enter a registered **Email** or **Username**.
 - b. Check the Confidentiality Agreement box
 - c. Click **Continue**.

Log In

Don't have a profile? [Sign up](#)

By continuing, I agree to the [UPS Technology Agreement](#) and authorize **[Customer Solutions - Application name]** to access data associated with my UPS.com username listed above, including UPS shipping account numbers, contact information, rates, and package tracking status.

Continue >

[Forgot Username/Password](#)

Note: Once the log in is complete, you authorize the user to use their information in the applications.

5. Enter your UPS.com password.

Password

Welcome back, Username

Log In >

[Forgot Username/Password](#)

Warning: When using the Opt-In method, changing the password for the ups.com the user that opted in will invalidate any previous Opt-In. Consequently, company admins will need to opt-in again whenever the password is changed.

You should get a confirmation of the company authentication and a token expiration date.

UPS API ACCESS
AUTHORIZED

An OAuth token exists for this company!
